Jesus Medina

DevOps-Focused Software Engineer | Cloud Infrastructure | AWS, Linux, Kubernetes

DevOps-focused software engineer with experience in cloud infrastructure, Linux environments, CI/CD pipelines, and Kubernetes-based systems. Strong background in AWS, deployments, monitoring (Prometheus/Grafana), and secure production environments, with transferable cloud knowledge applicable to GCP/GKE. Experience supporting federal systems handling sensitive data and building reliable, scalable infrastructure for real-world applications.

WORK EXPERIENCE

Content Manager
Jellyvision

07/2024 - 10/2024 *Chicago, Illinois*

Achievements/Tasks

- Published **50+ Data Releases** (DRs) for ALEX with **95%+** on-time rollouts.
- Ran Jenkins smoke tests, reducing release issues **~20%.**
- Coordinated closely with Engineering, QA, and Product to enhance DR reliability.

Sr DevOps Engineer
Smoothstack

03/2023 - 01/2024 *Fairfax, VA*

Achievements/Tasks

- Operated production/staging Kubernetes clusters supporting Federal Student Aid systems serving millions of users
- Used Prometheus and Grafana to monitor cluster health, system reliability, and performance across federal environments
- Led ROSA migration strategy for OpenShift clusters, improving scalability, security posture, and operational efficiency

Devops Engineer
Smoothstack

07/2021 - 03/2023 *Chicago, Illinois*

Achievements/Tasks

- Supported U.S. Department of Education / FAFSA platform work through Accenture Federal Services across 2+ years
- Built Jenkins CI pipelines and deployed Dockerized microservices to AWS/Kubernetes environments
- Deployed containerized services to AWS/Kubernetes environments using Docker and DevOps workflows
- Supported secure release processes, infrastructure automation, and DevSecOps practices for systems handling sensitive student data

Jr DevOps Engineer
Dom and Tom

06/2018 - 01/2019 *Chicago, Illinois*

Dom and Tom is a product agency that helps Fortune 500 companies and next generation startups build the future of digital.

Achievements/Tasks

- Utilized Docker for containerizing applications for startups/Fortune 500 companies, such as Tyson Foods and Pfizer Inc.
- Provisioned and deployed containers using Rancher Orchestration; a Kubernetes based technology.
- Performed over 20 application and database migrations to AWS for Tyson Foods Inc.

SKILLS

Programming Languages
Python, JavaScript, Java, Bash

Frameworks & Libraries
Django, React, React Native, Node.js, Spring Boot

Databases
MySQL, PostgreSQL

Cloud & DevOps
AWS, Docker, Kubernetes, Jenkins, Terraform, Ansible, OpenShift, EKS

AI-Assisted Development
AI debugging, refactoring, test generation, rapid prototyping

Web & Product
REST APIs, full-stack web development, UI component development, technical documentation, client collaboration

PROJECTS

Chi Coin - Community-Centered Neighborhood Platform (02/2025 - Present)

- Built a neighborhood-focused platform for wallet activity, local service exchange, and encrypted community messaging.
- Developed a Django backend and React Native frontend with real-time chat and RSA/AES hybrid encryption.
- Designed the product to strengthen neighborhood connection and address barriers tied to disinvestment, segregation, and social fragmentation.
- Built core architecture for onboarding, messaging, wallet flows, and economic simulation of local crypto activity.

Engineer Chi - Community-Focused Software Initiative (04/2020 - Present)

- Built a software initiative focused on practical web and mobile tools for local businesses, mission-driven organizations, and neighborhood-centered projects.
- Developed concepts and prototypes across civic software, booking systems, and local digital infrastructure.

EDUCATION

Coding Bootcamp
Chi Codes

08/2019 - 11/2019

Description

- Graduated valedictorian.
- Learned full-stack Python web development.
- Educational training was provided by the Coding Dojo.
- Program was sponsored by Facebook, Microsoft, and the Rockefeller Foundation.
